

The Market Oriented Smallholder Agriculture Project for Angola development objective is to increase agricultural production through provision of better services and investment support to rural smallholder farmers in selected comunas and municipios of targeted Provinces of Bie, Huambo and Malanje. There are three components to the project. The first component of the project is capacity building. This component will strengthen the technical, institutional, managerial and marketing skills of smallholders and their organizations, as well as of services providers and other stakeholders involved in agricultural production and value chains, to more effectively operate in a market-driven environment and to prepare for the agricultural investment support opportunities under component second. The second component of the project is agricultural investment support. This component will provide demand-based support, in the form of matching grants, to rural communities and smallholder groups and associations, for village productive infrastructure and agricultural production, processing and marketing sub-projects. The third component of the project is project management. This component will manage the project and use resources in accordance with the project objectives and procedure.
